

Cedar Architectural Inspired Beauty

A JELD-WEN Company

Cedar Architectural Inspired Beauty

Stegbar Cedar Architectural is a premium range of windows and doors crafted to capture the natural beauty, warmth and strength unique to cedar. Structurally bold, the wide frame and sash profiles enhance the visual character of cedar, allowing it to complement both contemporary and traditional architecture.

Stegbar Cedar Architectural combines innovative design and the tradition of quality joinery techniques to deliver a range of windows and doors that will become the feature of your home.

Stegbar Cedar Architectural windows are available as fixed, awning and casement styles. The Cedar Architectural door range has bi-fold, sliding and hinged styles.

Windows and Doors

Compared with the standard Stegbar cedar range, Cedar Architectural uses thicker and wider sash profiles. The 55mm thick sash profile of Cedar Architectural provides not only enhanced energy performance and a capacity to house large IGU's, but helps create extremely strong and durable windows and doors.

Stegbar's standard cedar range has sash profiles varying in width from 42mm to 112mm, while Cedar Architectural has a range from 112mm to 190mm. These create visually dominant windows and doors that can also be made higher and wider to create a truly stunning home.

Stegbar Cedar Architectural

Stegbar Cedar

Options

- A range of glazing choices from 6mm to 24mm
- Cedar can be supplied
 - Raw – ready to be stained or varnished
 - Pre-primed – ready for painting
- Traditional and contemporary style handles available
- Integrated insect screen (not available for bi-fold doors)

Benefits

- Will not warp or twist in any climatic conditions
- Fine grain structure minimises shrinkage and swelling, which prolongs the life of surface finishes
- Built-in natural preservatives provides resistance to borers, termites, rot and fungus growth
- Natural colour variation, ranging from honey beige to deep reds and browns
- Cedar can be re-finished to meet changing needs

Performance

All Stegbar Cedar Architectural windows and doors are manufactured to comply with Australian Standards for windows and doors in buildings AS2047 and the glass standard AS1288 including relevant human impact requirements.

Acoustic Performance

For optimal acoustic performance Stegbar Cedar Architectural windows and doors are capable of holding thicker glass than standard cedar windows and doors.

Energy Performance

Stegbar Cedar Architectural windows and doors are WERS rated. Data for a broad range of glazing options is available. For optimal thermal performance the Stegbar Cedar Architectural range can be glazed with an IGU up to 24mm thick.

To find out more about Stegbar IGU's refer to our Insulating Glass Unit brochure.
