## PROTECTIVE GLASS COATING

### NANOCLEAN 10 YEAR GLASS COATING WARRANTY

Stegbar Nanoclean Showerscreens have EnduroShield® glass coating treatment from PCT Global Pty Ltd applied to the surface of the glass to help resist against water and stains. This warranty does not cover the glass, hardware, installation or any other component of your showerscreen, other than the EnduroShield coating.

PCT Global Pty Limited warrants that EnduroShield will resist water and oil based stains for a 10 year period from the date of the invoice provided to your customer.

#### CONDITIONS

This warranty only applies if:

- The application of EnduroShield is done in accordance with directions and instructions given by PCT Global Pty Limited;
- Is applied to new glass;
- The product applied is within 12 months of its production date (as shown on the bottle);
- The glass is maintained as per the care instructions below.

If EnduroShield does not, in these circumstances, remain water and stain resistant for the 10 year period then PCT Global Pty Limited will gladly provide replacement EnduroShield for Glass in an amount determined to be adequate to re-coat the area that is deemed to be unprotected.

PCT Global Pty Limited reserves the right to inspect the glass in order to determine that the product has been applied and maintained in a manner consistent with the manufacturers' directions and instructions.

This warranty is given by PCT Global Pty Limited whose details are set out below:

Address: Unit 5, 21 Bearing Road, Seven Hills NSW

Telephone: +61 2 9674 9299 | Email: [sales@enduroshield.com](mailto:sales@enduroshield.com)

You will bear all costs and expense in making a claim under this warranty. To make such a claim you should send to PCT Global Pty Limited the following:

The original proof of purchase;

A brief explanation of the problems giving rise to the claim; and

Your contact details including telephone number.

You should allow up to 3 to 4 weeks for your claim to be processed by PCT Global Pty Limited.

#### EXCLUSIONS

This warranty doesn't include damage caused by sand or dust abrasion, often as the result of storms in or from dry areas. This warranty does not cover the glass, hardware, installation or any other component of your showerscreen, other than the EnduroShield coating.

#### CARE INSTRUCTIONS

EnduroShield makes your cleaning easier and less frequent; however it is recommended that you continue to clean the surfaces regularly. Please follow these instructions to ensure you care for your treated glass. Failure to follow the recommended cleaning instructions may result in damage to the coating and void the warranty.

## PROTECTIVE GLASS COATING

### Glass Shower Screens

A quick clean once a week or as required using a mild detergent\* and a sponge, or a damp good quality microfiber cloth will remove soap scum and grime from the glass. The use of a high quality professional grade squeegee (such as Ettore or Pulex) may be used to dry the glass\*\*, however it is not a necessity.

### Glass Windows, Facades, Doors, Pool Fencing, Glass Railings, Mirrors & Splashbacks

Using a mild detergent\* and water, wash the glass with a sponge or damp good quality microfiber cloth, and dry the glass\*\* with a high quality professional grade squeegee (such as Ettore or Pulex). For best results clean the glass when covered with shade to prevent streaking. In areas prone to salt build-up or dust build-up, rinse off excess contaminants with a hose using fresh water before cleaning. Note: cleaning before removing these abrasive contaminants may damage the coating.

### Caution

Do not to use any rough, gritty, highly acidic, alkaline or abrasive cleaners such as Comet (powder), Ajax or cerium oxide as they may damage the protective coating. Cleaners like this damage or polish back the actual substrate of the surface. They are not required or recommended for use on EnduroShield treated surfaces.

In areas with hard water or bore water, mineral deposits, containing calcium and magnesium ions, may build-up on the protective coating and not be easily removed with a mild detergent\*. A solution of white vinegar and water (1 part vinegar to 5 parts water); will need to be used occasionally to dissolve these deposits. If the lime scale is still proving difficult to remove use a more concentrated vinegar solution. Allow the vinegar solution to sit on the surface for 5-10 minutes to help dissolve lime deposits before cleaning as their abrasive nature may damage the coating.

### Tip for extreme hard water conditions

Around the world there are some unique locations which have extremely harsh conditions. In these harshest of water environments, EnduroShield is a great choice. Simply put if you didn't have the EnduroShield protection, your glass may have to be restored to bring back the clarity or even replaced. In some cases this staining can occur in less than 1 year. New Orleans, Louisiana, some European countries and Western Australia are examples of areas with very high mineral concentrations.

Being so robust, the EnduroShield coating is a great option in these conditions. EnduroShield allows you to have great looking glass, but it takes a little more work due to these specific environmental conditions. In such environments minerals are so prevalent in the water that they can still create a build up on the EnduroShield coating, (it is not damaging the glass but can build up over time) and become difficult to remove. We recommended using the vinegar / water solution (listed above) every week or so as a cleaning option to reduce this build up on the surface, rather than allowing the build up to continue over a long period of time.

\* A mild detergent such as dish washing liquid at a 0.5% solution (5g (0.2 oz) to a Litre (1 Qrt) of fresh water is recommended.

\*\* Do not use a squeegee on dry glass as this may damage the coating over time.

Should you have any queries regarding the cleaning of your treated surfaces please contact EnduroShield in your country or visit [www.enduroshield.com](http://www.enduroshield.com)
